Job Description & Selection Criteria

Targeted Disciplines (if any):

Computer Science or similar

But really, you just need to know computers, so don't get too caught up on academic background. Half the people I did CS with wouldn't even know how to install RAM anyway :P

Selection Criteria:

ESSENTIAL:

- own vehicle
- outstanding verbal communication skills (native-level English)
- experience dealing with clients (e.g. in retail) where you have had to provide them with advice
- PC-based troubleshooting skills
- Wireless (+wired) networking setup & troubleshooting
- Flexible timetable & ability to respond quickly (e.g. via SMS) to prospective jobs.

HIGHLY DESIRABLE:

- ABN (or willingness to apply - it's free)
- own laptop
- willingness to work from home as required (requires broadband)
- Extensive Linux knowledge (not necessarily in a commercial setting)
- RAID & backup experience

DESIRABLE:

- Mac OS X troubleshooting skills
- LAMP programming skills

BONUS:

- Excellent web design & development skills
- Excellent visual design skills (e.g. corporate identity)

Job Description:

Waterfront IT provides IT Support, Development and Consulting services for SME's and individuals. We are currently a 2-man band working part-time and require some additional help as we expand.

You will spend most of your time working on-site to fix virus problems, set up networks, purchase & install equipment on behalf of clients and any other general IT tasks clients need.

We currently have a number of web development projects on the cards, so if you're able to help us with them that would be great. If not, having two people is okay - you just need to be excellent at at least one aspect ;-)

Application Info Required

Covering Letter, CV / Resume

Further Information on How To Apply

Please apply via EMAIL.

Include a SKILLS MATRIX in your CV, outlining your main skill areas and level of competence therein. Be honest but confident of your abilities. Use the following criteria:

- basic (some familiarity)

- intermediate (experienced)
- advanced (could teach someone)

Applications exhibiting poor spelling and/or grammar will be filed in the circular filing cabinet.
